The History of Grafton
The rise and fall of industry, the part of the rhythm of life in Grafton. The community’s first major encounter with the rising waters occurred in 1988. Freiman designed the levee to rise over 20 feet, allowing the river to rise over the levee, dried itself off and continued on to the next town.

The Early 1900s
The early 1900s were a time of growth and change, and the town of Grafton was no exception. The early 1900s saw the rise of industry, including the famous Grafton Stone Printing Press. The company was one of the only industries that transitioned into the new century, and it is now a favorite activity for visitors to Grafton. Rent boats and jet skis and hit the river trails on the Mississippi and Illinois rivers for an adventure to remember.
